📍 Mumbai, IN

SUMMARY

I am a Full Stack Developer with 2 years of hands-on experience, specializing in both web and app development. My journey began as a Junior Technical Officer at CSI VESIT later transitioned into the role of a Flutter Developer at Juno Terra Company. I am a collaborative team player who thrives on solving complex problems through code. I have a natural aptitude for learning and adapting swiftly to evolving project requirements, always with a keen eye for detail.

PROFESSIONAL EXPERIENCE

Mobile Developer Intern

Aircubic - Junoterra

📅 01/2023 - 04/2023 📍 Mumbai, IN

Junoterra is a tech startup founded in 2020 by software and AI experts. They provide environmental awareness through technology for sustainable development

- Developed a robust mobile application with Flutter, showcasing proficiency in problem-solving, code optimization, and UI enhancements to boost performance and maintainability.
- Expanded the app's capabilities through real-time graph integration and seamless API interaction.
- Expertly handled state management using GetX and implemented efficient local storage solutions for streamlined data management.

Jr. Technical Officer

CSI VESIT

📅 02/2023 - 07/2023 📍 Chembur, IN

The Computer Society of India - VESIT is a professional organization in India dedicated to advancing the field of computer science and technology

- Organized college workshops and tech events, collaborating with a 30+ member team.
- Created an app to enhance student-council interaction, streamlining event registration processes and promoting future events.

PROJECTS

Nyaya Sevak

🌐 <https://github.com/himanshugoyal77/sih-new-frontend>

Nyaya Sevak is a Full Stack solution designed to streamline access to various legal service providers, including lawyers, notary writers, and legal aid clinics, all in one convenient online platform.

- Implemented features like Video consultation, Lawyer recommendation, Appointment scheduling, Chatboat assistant, Discussion forum, etc.
- Used websockets for realtime communication, firebase OTP verification for user authenticity & Stripe for payment gateways.
- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

Discussion Forum Website

🌐 <https://github.com/himanshugoyal77/discussion-forum>

A dynamic discussion forum website featuring real-time websockets for seamless communication, a Q&A platform, and robust user engagement.

- Developed a full stack website with a tech stack including React, Node.js, WebSocket technology, and MongoDB database.
- User data security was ensured through user authentication, authorization, and JWT for secure token-based authentication.

KEY ACHIEVEMENTS

Winner Invictus23 Hackathon

Won a 24 hours hackathon organised by ISTE VESIT. Competed against 40+ teams. Developed a website to streamline Blood Donation process.

Top 5 in Syrus Hackathon

Only second year team to qualify in final round. Made a mobile app for better travelling experience by finding nearby hotels, buses and routes.

Speaker at flutter workshop

Delivered engaging and informative sessions on cross-platform app development. Made a weather app project with API calling.
